(https://profile.intra.42.fr/searches) SCALE FOR PROJECT INIT (/PROJECTS/INIT)

You should evaluate 1 student in this team

Git repository

vogsphere@vgs.42.us.or

Introduction

Please respect the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the person (or the group) graded the eventual dysfunctions of the work. Take the time to discuss and debate the problems you have identified.
- You must consider that there might be some difference in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade him/her as honestly as possible. The pedagogy is valid only if the peer-evaluation is conducted seriously.

Guidelines

- Only grade the work that is in the student or group's GiT repository.
- Double-check that the GiT repository belongs to the student or the group. Ensure that the work is for the relevant project and also check that "git clone" is used in an empty folder.
- Check carefully that no malicious aliases was used to fool you and make you evaluate something other than the content of the official repository.
- To avoid any surprises, carefully check that both the evaluator

and the evaluated students have reviewed the possible scripts used to facilitate the grading.

- If the evaluated student has not completed that particular project yet, it is mandatory for this student to read the entire subject prior to starting the defence.
- Use the flags available on this scale to signal an empty repository, non-functioning program, a norm error, cheating etc. In these cases, the grading is over and the final grade is 0 (or -42 in case of cheating). However, with the exception of cheating, you are encouraged to continue to discuss your work (even if you have not finished it) in order to identify any issues that may have caused this failure and avoid repeating the same mistake in the future.

Sujet (https://cdn.intra.42.fr/pdf/pdf/1381/init.fr.pdf)
Subject (https://cdn.intra.42.fr/pdf/pdf/1308/init.uk.pdf)
Subject (https://cdn.intra.42.fr/pdf/pdf/1281/init.en.pdf)

Part 1 - Follow Slash 16 around the world

You have to follow us in the whole world

The student has followed Slash16 on Linkedin, Facebook and Twitter

The student has followed Slash 16 on Linkedin, Facebook and Twitter

 \times No

Part 2 - Network

Evaluation of Part 2 - Network

Get the list of the network interfaces of the machine without displaying any detail

Check that the answer file contains the command which lists the names of the interfaces of the machine and no other information. For instance:

Identify the IP address of the DNS server which answers to slash 16.org

Check that the answer file contains the command which identifies and displays the IP address of the DNS server. For instance:

\$>`cat 05`

Address: 10.51.1.42		
Non-authoritative answe Name:slash 16.org Address: 195.154.52.15 Name:slash 16.org Address: 195.154.52.15 \$>	7	
	∀Yes	imesNo
Get the complete pat	h of the file that contains the IP address of t	he DNS server you're using
	e contains the complete path of the file in he used DNS server is written.	
\$>cat 06 /etc/resolv.conf \$>		
	∀Yes	imesNo
Query an external D	NS server on the same domain name (ex, ç	google 8.8.8.8)
	e contains the command which	
	to solve the same domain name. For instance:	
use another DNS server \$>`cat 07` Server:8.8.8.8		
	to solve the same domain name. For instance: er:	

https://projects.intra.42.fr/scale_teams/1750005/edit

Check that student's answer in the file is AWS (Amazon Web Services).

		imesNo
Find the exter	nal IP of 42.fr	
	to show you his approach and explainent's answer in the file is 163.172.250	
		imesNo
Identify the n	etwork devices between your co	omputer and the slash16.org domain
identifies and di	unswer file contains the command which splays the different network devices band slash 16.org.	
1 10.8.0.1 (10. 2 10.42.1.254 3 nat-1.42.fr (10 4 dc3.42.fr (62 5 195.154.1.17 6 a9k2-45x-s4 7 195.154.1.17	ash 16.org (195.154.52.158), 64 hops 8.0.1) 5.809 ms 6.087 ms 3.124 ms (10.42.1.254) 6.005 ms 13.668 ms 7 0.60.1.11) 7.530 ms 3.379 ms 9.966 .210.35.1) 7.100 ms 7.587 ms 5.160 4 (195.154.1.174) 57.350 ms 168.09 4-2.dc3.poneytelecom.eu (195.154.7 9 (195.154.1.179) 4.077 ms 46.904 5.org (195.154.52.158) 5.699 ms 6.0	7.037 ms 0 ms 0 ms 1 ms 93 ms 8.906 ms 1.106) 6.590 ms 3.910 ms 5.525 ms 0 ms 3.883 ms
		imesNo
		nd the name and the IP address of the device that and the outside world.
	k berween you (local nerwork) a	
makes the İinl	ent's answer in the file is the NAT serve	

✓ Yes

 \times_{No}

Thanks prevously answer and DNS server find your hostno	ame
Check that student's answer in the file is student host name.	
	imesNo
What file contains the local DNS entries?	
Check that student's answer in the file is /etc/hosts.	
⊘ Yes	×N₀
Make the intra.42.fr address reroute to 46.19.122.85	
Ask the student to show you his approach and explain it. Check that student's answer in the file is '46.19.122.85 intra.42.fr'.	
⊗ Yes	imesNo
Part 3 - System Evaluation of Part 3 - System	
In what file can you find the installed version of your Debic	an?
Check that student's answer in the file is /etc/debian_version.	
⊗ Yes	imesNo
What command can you use to rename your system?	
Check that the answer file contains the command which rename the system. For instance:	
\$>`cat 02` machine.old.name.local	
macnine.oia.name.iocai \$>	
	×N₀

Check that student's answer in the file is /etc/hostname.

✓ Yes

 \times No

What command gives your system was last booted?

Check that the answer file contains the command which gives the time since the last boot of the system. For instance:

\$>`cat 04`

17:44 up 1 day, 6:45, 4 users, load averages: 1.33 1.42 1.40

\$>

✓ Yes

 \times No

Name the command that determines the state of the SSH service?

Check that the answer file contains the command which determines the state of the SSH service. For instance with init.d:

\$>`cat 05`

openssh-daemon (pid 22405) is running...

\$>

Or with service:

\$>`cat 05`

• ssh.service - OpenBSD Secure Shell server

Loaded: loaded (/lib/systemd/system/ssh.service; enabled)

Active: active (running) since Fri 2016-12-02 18:42:05 CET; 1 months 0 days ago

Main PID: 13106 (sshd)

CGroup: /system.slice/ssh.service

2461 ssh-agent -s

-13106 /usr/sbin/sshd -D

—27517 sshd: skyline [priv]

-27519 sshd: skyline@pts/0

├<u></u>27561 sudo su

├---27562 su

----27563 zsh

---27589 systemctl status sshd.service

\$>

✓ Yes

 \times No

Name the command that reboots it.

Check that the answer file contains the command which reboot the SSH service. For instance with init.d:

\$>`cat 06`

Stopping sshd: [OK]

Starting sshd: [OK]

\$>

Or with service:

\$>`cat 06`

\$> service sshd status

• ssh.service - OpenBSD Secure Shell server

Loaded: loaded (/lib/systemd/system/ssh.service; enabled)

Active: active (running) since Fri 2016-12-02 18:42:05 CET; 10s ago

Main PID: 13106 (sshd)

CGroup: /system.slice/ssh.service

2461 ssh-agent -s

-13106 /usr/sbin/sshd -D

-27517 sshd: skyline [priv]

—27519 sshd: skyline@pts/0

----27520 -zsh

<u></u>27561 sudo su

---27562 su

----27563 zsh

27589 systematl status sshd.service

\$>

The displayed time in Active has to be in seconds because of the reboot of sshd.

✓ Yes

 \times No

Figure out the PID of the SSHD service

Check that the answer file contains the command which figure out the PID of the ssh service. For instance:

\$>`cat 07`

root 22405 0.0 0.0 66224 1184 ? Ss 17:46 0:00 /usr/sbin/sshd

\$>

What file contains the RSA keys authorized to connect via SSH?

Check that student's answer in the file is .ssh/authorized_keys

✓ Yes

 \times No

What command lets you know who is connected to the System?

Check that the answer file contains the command which lets you know who is connected to the system. For instance:

\$>`cat 09` skyline console Mar 23 10:59 skyline ttys000 Mar 24 17:04 \$>

✓ Yes

 \times No

Name the command that lists the partition tables of drives?

Check that the answer file contains the command which lists the partition tables of drives. For instance:

\$>`cat 10`

Disk /dev/sdb: 2000.4 GB, 2000398934016 bytes 255 heads, 63 sectors/track, 243201 cylinders Units = cylinders of 16065 * 512 = 8225280 bytes Sector size (logical/physical): 512 bytes / 512 bytes I/O size (minimum/optimal): 512 bytes / 512 bytes Disk identifier: 0x00000000

\$>

✓ Yes

 \times No

Name the command that displays the available the space left and used on the system in an humanly understandable way

Check that the answer file contains the command which displays the available space left and used on the system in an humanly understandable way. For instance:

\$>`cat 11`

Filesystem Size Used Avail Use% Mounted on /dev/xvda2 7.8G 1.2G 6.3G 16% / udev 10M 0 10M 0% /dev tmpfs 200M 4.2M 196M 3% /run tmpfs 500M 0 500M 0% /dev/shm tmpfs 5.0M 0 5.0M 0% /run/lock tmpfs 500M 0 500M 0% /sys/fs/cgroup \$>

✓ Yes

 \times No

Figure out the exact size of each folder of /var in a humanly understandable way followed by the path of it.

Check that the answer file contains the command which displays the exact size of each folders of /var in a humanly understandable way followed by the path of it. For instance:

\$>`cat 12`
4.0K /var/opt
864K /var/spool
1.3M /var/log
111M /var/lib
124M /var/cache
4.0K /var/local
8.0K /var/mail
1.1M /var/backups
4.0K /var/tmp

238M /var

\$>

✓ Yes

 \times No

Name the command that find, in real time, currently running processes

Check that the answer file contains the command which displays running processes in real time.

For instance:

\$>`cat 13`

Tasks: 58 total, 1 running, 57 sleeping, 0 stopped, 0 zombie

%Cpu(s): 0.0 us, 0.0 sy, 0.0 ni, 100.0 id, 0.0 wa, 0.0 hi, 0.0 si, 0.0 st KiB Mem: 1022952 total, 359176 used, 663776 free, 168200 buffers

KiB Swap: 0 total, 0 used, 0 free. 86924 cached Mem

PID USER PR NI VIRT RES SHR S %CPU %MEM TIME+ COMMAND

\$>`cat 15` [1]+ Terminated tail -f /var/log/syslog \$>	×No ks following a regular schedule
1]+ Terminated tail -f /var/log/syslog \$>	
[1]+ Terminated tail -f /var/log/syslog \$>	imesNo
1]+ Terminated tail -f /var/log/syslog	
1]+ Terminated tail -f /var/log/syslog	
For instance:	
xills the process of the tail -f /var/log/syslog command.	
Check that the answer file contains the command which	
Find the command that kills the background command's pr	rocess
⊗ Yes	×N₀
\$>	
Mar 25 08:17:01 CRON[2656]: (root) CMD (cd / && run-parts	
nfo="http://www.rsyslog.com"] rsyslogd was HUPed Mar 25 07:17:01 CRON[2601]: (root) CMD (cd / && run-parts	report /etc/cron hourly)

Check that the answer fil via ssh on the VM.	e contains the command which	n allows you tu connect
	∀Yes	imesNo
Find the command the	at kills ssh service	
Check that the answer fil kill ssh service.	e contains the command which	n
	✓ Yes	imesNo
List all services which	are started at boot time a	and name this kind of services
	e contains the List all services v iis kind of services (daemon)	which are started
abrt-ccpp 0:off 1:off 2:o abrt-oops 0:off 1:off 2:o		
	⊗ Yes	imesNo
List all existing users	on the VM	
Check that the answer fil	e contains the List all existing u	isers on the VM
	⊘ Yes	imesNo
List all real users on t	he VM	
Check that the answer fil and not system users	e contains the list all real users	on the VM
	✓ Yes	imesNo
Find the command the	at add a new local user	

Check that the answer file contains the command that add a new local user

Explain how connect yourself as new user

Check that the answer file containe contain how to connect yourself as new user on the VM on ssh session (command etc.) AND on graphic session.

Find the command that list all packages

Check that the answer file contain the command that list all installed packages

Part 4 - Scripting

Evalution of the part 3 - Scripting

Write a script which displays only the login, UID and Path of each entry of the /etc/passwd file

Check that the script displays only the login, UID and Path of each entry of the /etc/passwd file.

For instance:

\$>sh 1

root:0:/bin/bash

daemon: 1:/usr/sbin/nologin

bin:2:/usr/sbin/nologin

sys:3:/usr/sbin/nologin

sync:4:/bin/sync

games:5:/usr/sbin/nologin

man:6:/usr/sbin/nologin

lp:7:/usr/sbin/nologin

mail:8:/usr/sbin/nologin

news:9:/usr/sbin/nologin

uucp: 10:/usr/sbin/nologin

proxy: 13:/usr/sbin/nologin

www-data:33:/usr/sbin/nologin

backup:34:/usr/sbin/nologin

list:38:/usr/sbin/nologin

irc:39:/usr/sbin/nologin

gnats:41:/usr/sbin/nologin

nobody:65534:/usr/sbin/nologin systemd-timesync:100:/bin/false systemd-network:101:/bin/false systemd-resolve:102:/bin/false systemd-bus-proxy:103:/bin/false sshd:104:/usr/sbin/nologin Debian-exim:105:/bin/false postfix:106:/bin/false skyline:1000:/bin/bash

\$>

✓ Yes

 \times No

Write a script which delete an ACTIVE user on the VM.

Check that the script delete an ACTIVE user on the VM.

For instance:

Create an user.

Connect you at the VM.

Launch your script.

List all existing users. (New user should not appear)

✓ Yes

 \times No

Three's a Charm. Write a script of you choice.

Check script's utility and complexity.

Kule II II

Rate it from 0 (failed) through 5 (excellent)
